SUBJECT:- TABLEAU

Practical 12

Aim:- Sharing, Publishing, and Presenting Data Visualizations.

A] Export dashboards as PDF/Image

Step 1:- Connect to netflix_titles.csv (use Text file connection).

2. Drag type to Rows.

3. Drag netflix_titles.csv (Count) (or number of records) to Columns. 4. Drag type to Color (Marks card)

Result: A horizontal bar chart showing Movies vs. TV Shows.

Step 2:- Create a worksheet named: Growth by Release Year. Drag release_year to Columns (ensure it is Continuous or an unbroken timeline). Drag netflix_titles.csv (Count) to Rows. Drag type to Color

Filter: Drag release_year to Filters select Range of values set from 2000 to 2021 (removes sparse historical outliers). Result: A dual-line trend chart showing content volume over time

Step 3:- 1. Create a worksheet named: Growth by Release Year.

2. Drag rating to Columns.

3. Drag netflix_titles.csv (Count) to Rows.

Step 4:- 1. Click the New Dashboard tab and rename it: Netflix Executive Overview.

2. In the Dashboard pane on the left, under Size, select the dropdown: o Choose Fixed Size --> A4 Landscape (1169 x 827 px) or Letter Landscape (1100 x 850 px). (Fixed size prevents layout shifts during PDF export).

3. Drag a Horizontal or Vertical Container onto the canvas.

4. Add a Text object at the top: Netflix Global Content Catalog Analysis(20pt Bold).

5. Drag your sheets into the canvas:

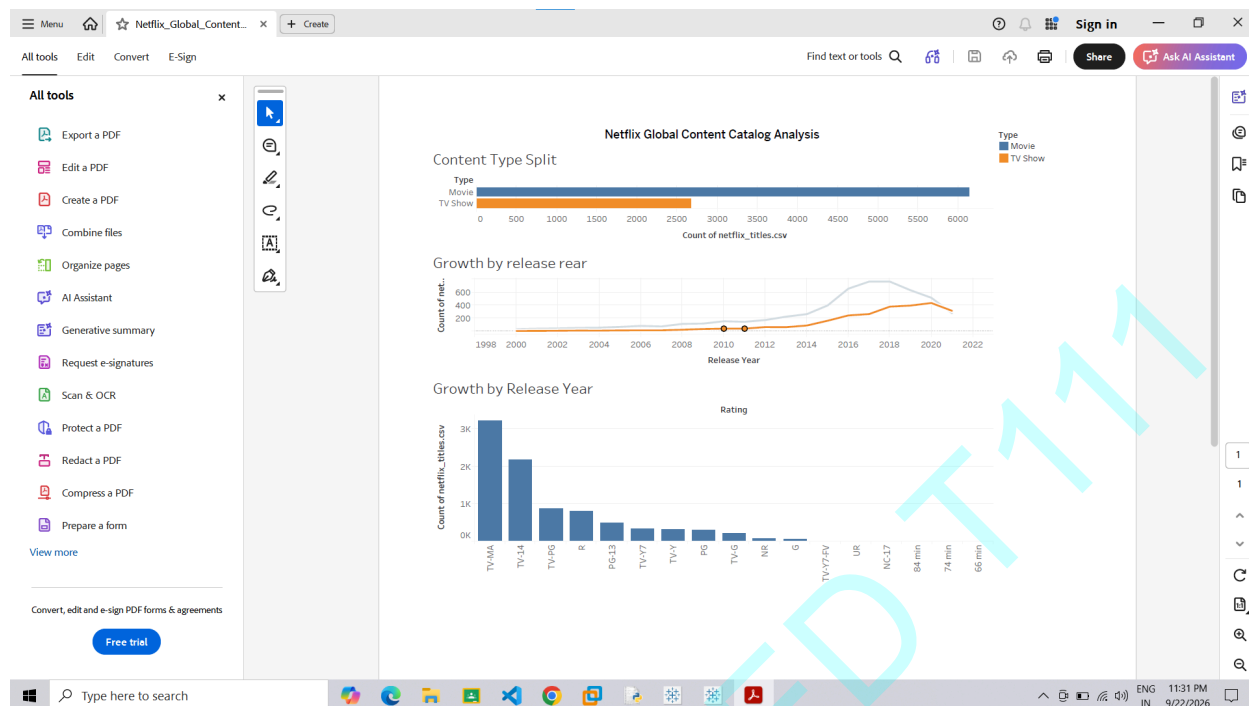

Place Content Type Split on the top left.

Place Top 10 Ratings on the top right.

Place Growth by Release Year across the bottom.

SUBJECT:- TABLEAU

B: Use Presentation Mode in Tableau

Step 1. Open your Netflix Executive Overview dashboard in Tableau Desktop.

2. Enter Presentation Mode using any of these methods:

- o Keyboard Shortcut: Press F7 (Windows) or Cmd + Enter (Mac).
- o Toolbar Icon: Click the Presentation Mode icon (a small projection screen icon) in the top application toolbar.
- o Menu Path: Go to the top menu and select Window --> Presentation Mode.

Sheet Navigation: Use the left/right arrows on the toolbar (or the Page Up / Page Down keys) to cycle through all worksheets, dashboards, and stories in your workbook.

Live Interactive Filtering: Click on any bar or line mark (e.g., clicking Movies in the split chart) to demonstrate real-time cross-filtering. Interactive Tooltips: Hover over data points to present granular numbers on demand without cluttering the main slide.

Reset / Revert: Click the Revert arrow on the presentation toolbar to reset all filters back to their initial state.

1. Hover Exploration:

- o Move your mouse over individual data marks (e.g., specific bars in Content Type Split or peak data points in Growth by Release Year).

2. Interactive Filtering:

- o If quick filters or legends are placed on the dashboard, click to filter or highlight categories live.

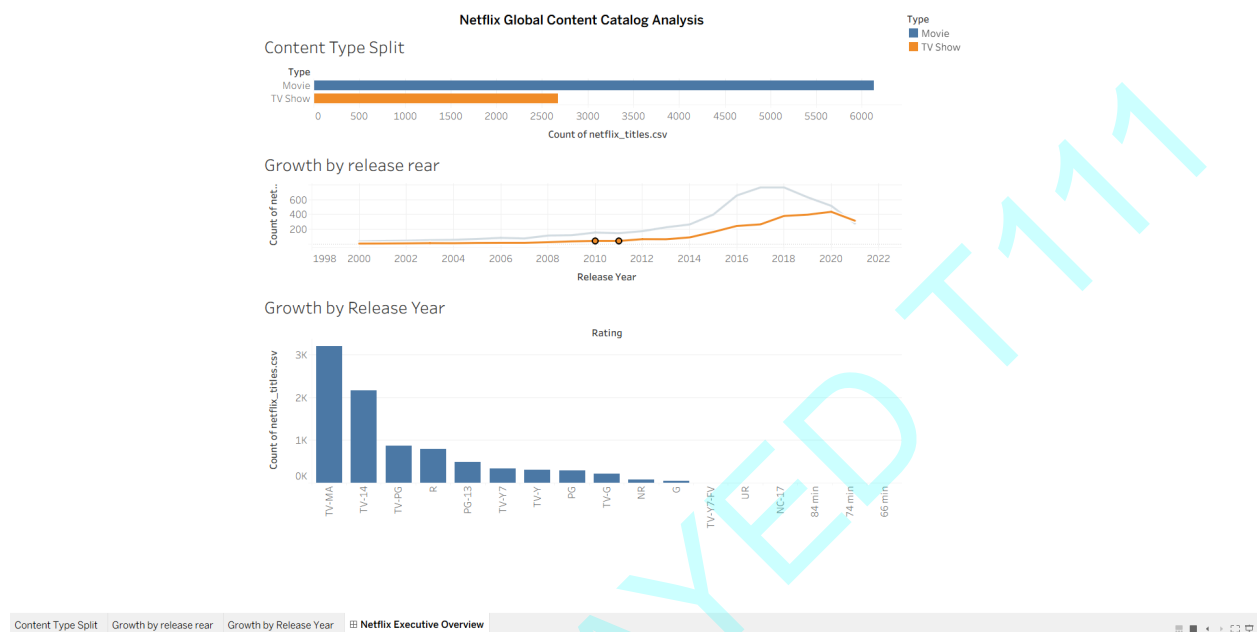

3. Multi-Sheet Navigation:

- o Move your mouse to the bottom-left corner to reveal the subtle navigation toolbar.

SHETH MVLU COLLEGE

SUBJECT:- TABLEAU

- o Use the Next Sheet () and Previous Sheet () arrows (or the Page Up / Page Down keys) to cycle between individual worksheets and dashboards seamlessly.
- o Confirm that tooltips render cleanly with exact counts and dates.

C: Publish Dashboards to Tableau Public

Step 1:-o Go to the Data Source tab in the bottom-left corner. o In the top-right corner, select the Extract radio button.

Step 2. In the Data Pane, click the drop-down menu icon (small down-arrow next to the search bar).

2. Select Hide All Unused Fields.

o Outcome: Columns not used in your visualizations or calculations (e.g., full text descriptions or raw cast lists, if unused)

Step 3:- 1. Click on the Netflix Executive Overview tab at the bottom so it is active.

2. In the left-hand Dashboard panel, ensure Size is set to Fixed Size (e.g., 1366 x 768 px or A4 Landscape).

Step 4:- Go to the top menu bar and click File --> select Export Packaged Workbook... (or File --> Save As...).

2. In the file save window:

o File name: Netflix_Global_Content_Catalog.twbx

o Save as type: Select Tableau Packaged Workbook (*.twbx)

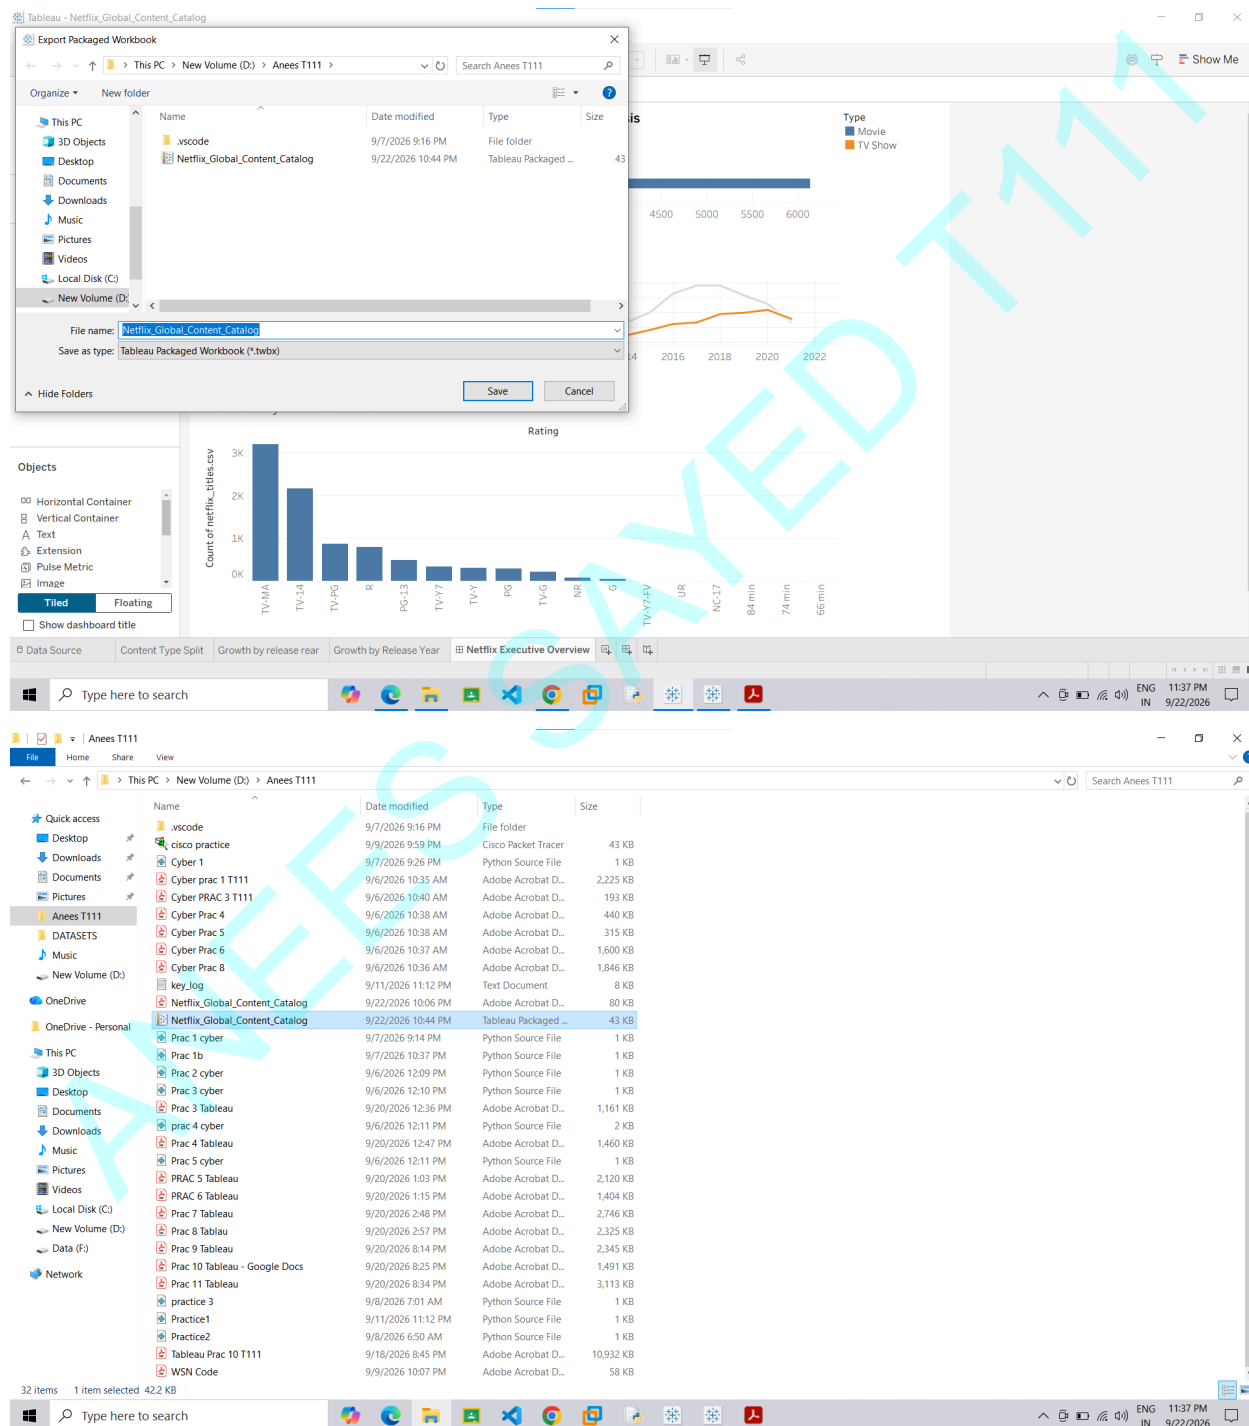

3. Click Save.

Step 5:- 1. In your operating system file explorer (Windows Explorer), locate Netflix_Global_Content_Catalog.twbx.

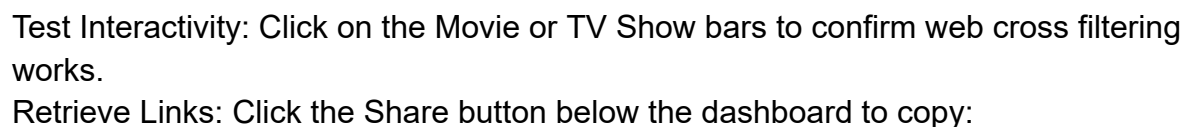

SHETH MVLU COLLEGE

SUBJECT:- TABLEAU

2. Notice the file icon: a standard Tableau workbook icon with a small orange package emblem.
3. (Technical Verification) A .twbx file is internally a standard ZIP archive. If you rename the extension from .twbx to .zip and open it, you will find:
 - o The .twb (XML schema and visualization code).
 - o A Data folder containing the compressed .hyper extract.

Additional Step:- 1. Open your web browser and go to public.tableau.com. 2. Sign in to your free Tableau Public account (or click Sign Up to create one). 3. In the top navigation bar, click your Profile Avatar (top-right) --> select My Profile.

SHETH MVLU COLLEGE

SUBJECT:- TABLEAU

o Direct URL: For resumes, LinkedIn, or portfolio submissions.

o LINK:

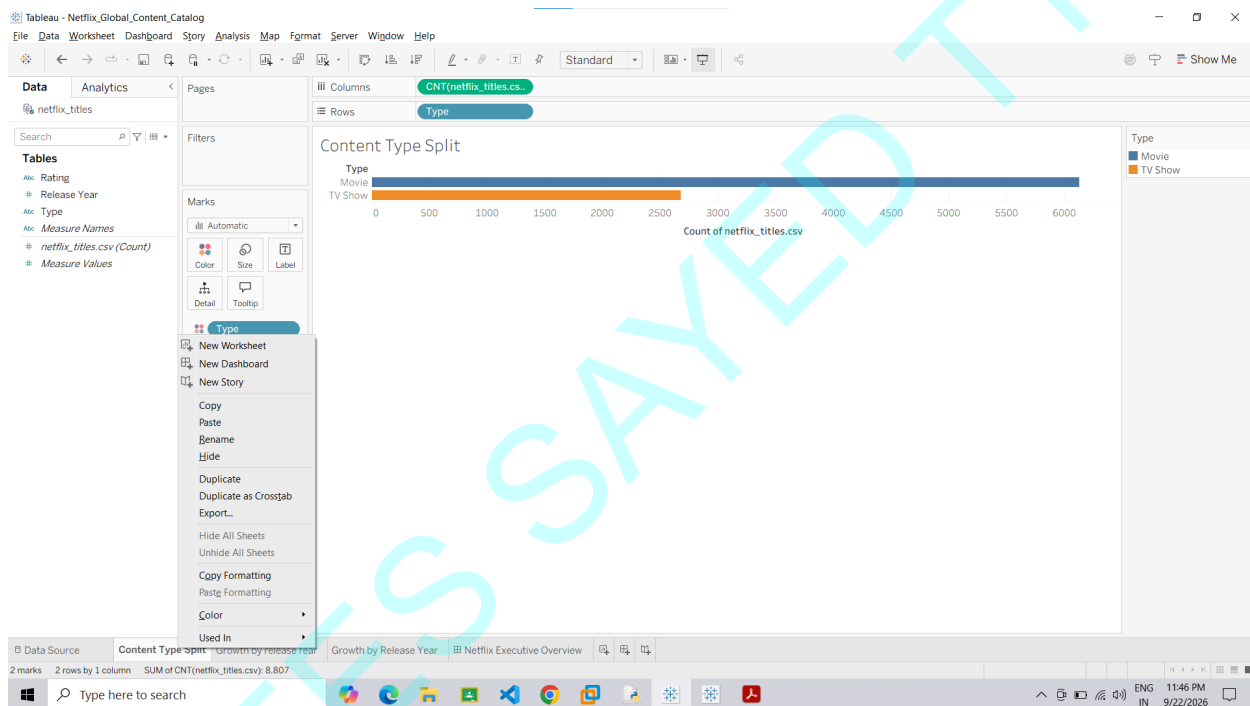

https://public.tableau.com/app/profile/anees.sayed/viz/Netflix_Global_Content_Catalog_17900974462950/NetflixExecutiveOverview

o Embed Code: For embedding into HTML websites or blogs.

D: Share Dashboards via Tableau Server / Tableau Cloud

Step 1:- Right-click the Content Type Split tab --> select Hide Sheet. Right-click Growth by Release Year --> select Hide Sheet.

Right-click Top 10 Ratings --> select Hide Sheet.

The screenshot displays the Tableau Desktop interface with a dashboard titled "Netflix Global Content Catalog Analysis". The dashboard is composed of three main visualizations:

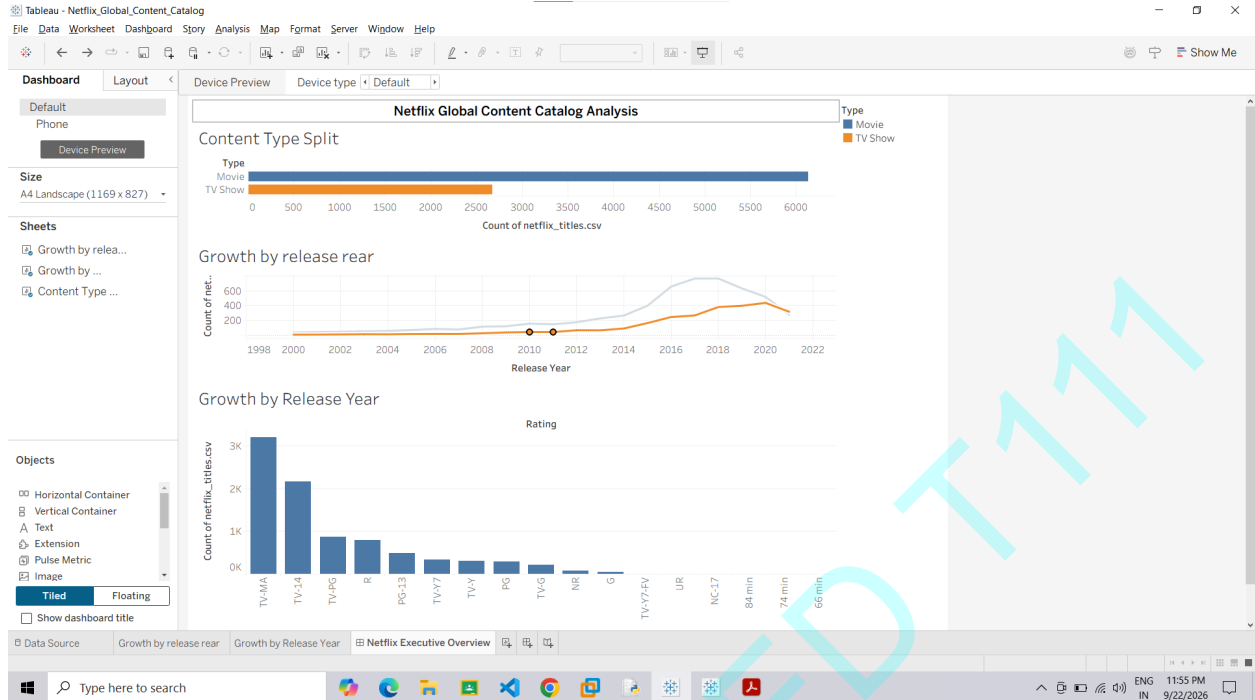

- Content Type Split:** A horizontal bar chart showing the count of netflix_titles.csv for two categories: Movie (blue bar, approximately 5800) and TV Show (orange bar, approximately 2800). The x-axis represents the count, ranging from 0 to 6000.
- Growth by release year:** A line chart showing the count of netflix_titles over time from 1998 to 2022. The y-axis represents the count of netflix_titles, ranging from 0 to 600. The chart shows a steady increase in the number of titles over the years, with a notable peak around 2018.
- Growth by Release Year:** A bar chart showing the count of netflix_titles by rating. The y-axis represents the count of netflix_titles, ranging from 0K to 3K. The ratings are listed on the x-axis: TV-14, TV-14, TV-PG, R, PG-13, TV-Y7, TV-Y, PG, TV-G, NR, G, TV-14-FV, UR, NC-17, 84 min, 74 min, 66 min.

The Tableau Desktop interface includes a top toolbar with various tools, a sidebar on the left with sections for "Dashboard", "Layout", "Device Preview", "Device type", "Default", "Size", "A4 Landscape (1169 x 827)", "Sheets", "Content Type ...", "Growth by relea...", "Growth by ...", "Objects", "Horizontal Container", "Vertical Container", "Text", "Extension", "Pulse Metric", "Image", "Tiled", "Floating", "Show dashboard title", and a bottom toolbar with "Data Source", "Netflix Executive Overview", and various view options. The system tray at the bottom shows the date and time as 11:53 PM on 9/23/2026.

E: Enable User Interaction on Shared Dashboards

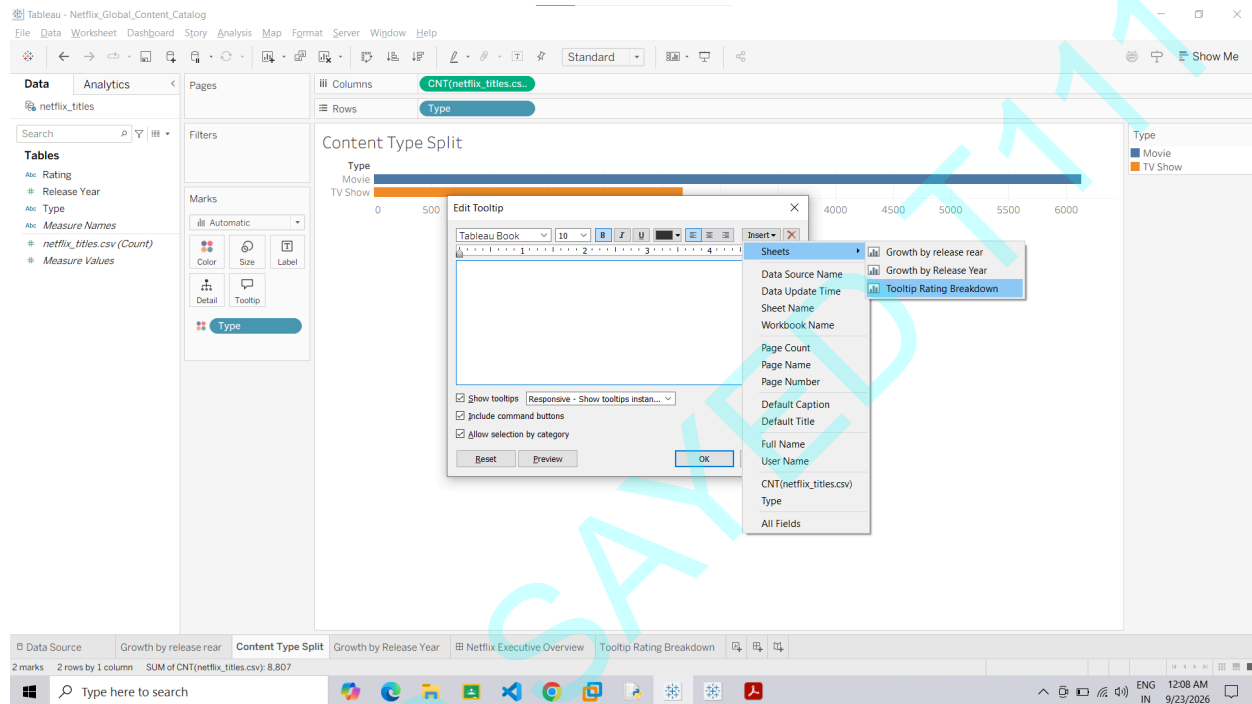

Step 1:- 1. Create a new worksheet named: **Tooltip Rating Breakdown**. 2. Drag Rating onto the Rows shelf. 3. Drag netflix_titles.csv (Count) onto the Columns shelf. 4. Drag Rating onto the Color tile on the Marks card. 5. Sort the bars in descending order.

SHETH MVLU COLLEGE

SUBJECT:- TABLEAU

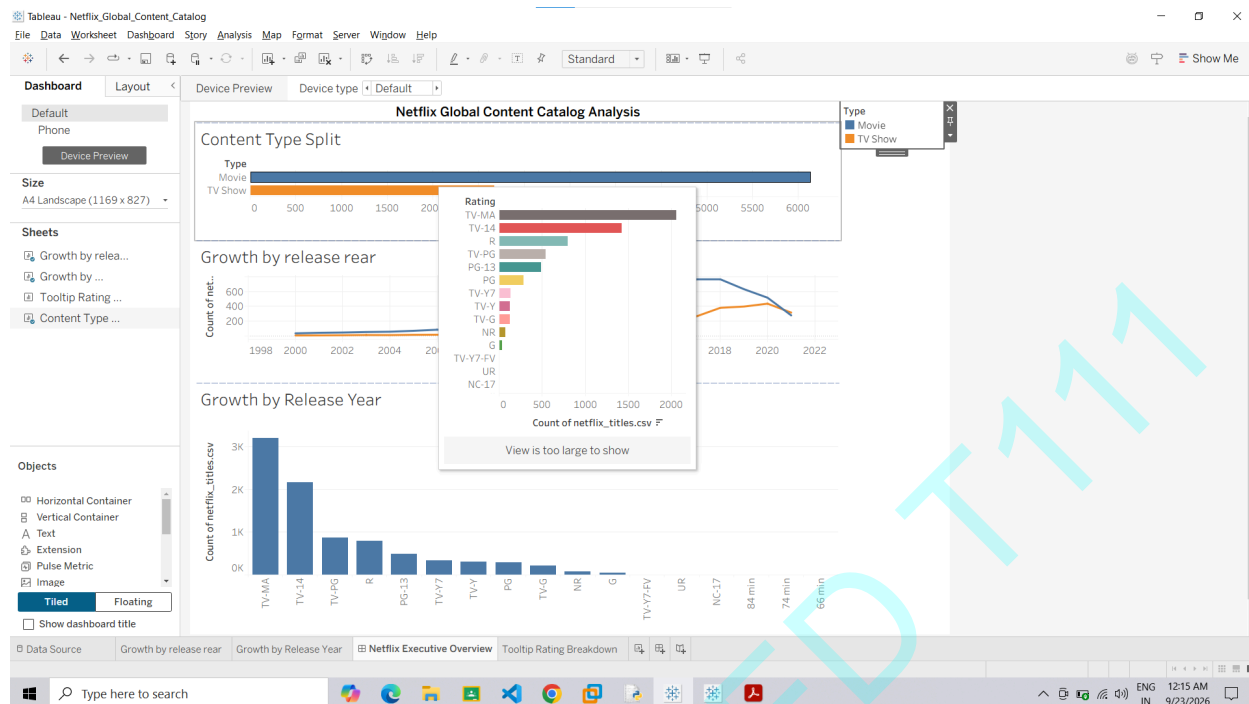

- Step 2:-
1. Return to your Content Type Split worksheet.
 2. On the Marks card, click the Tooltip tile.
 3. In the Edit Tooltip dialog:
 - o Delete default text if desired, then click Insert in the top-right corner of the editor.
 - o Select Sheets --> Tooltip Rating Breakdown.
 - o Tableau inserts the code tag:
 4. Click OK.

5. Switch back to your Netflix Executive Overview dashboard and test it: Hover your mouse over the Movie bar: you will see a mini-bar chart inside the tooltip showing the rating distribution for movies only.

SHETH MVLU COLLEGE

SUBJECT:- TABLEAU

Step 3:- 1. Open your Netflix Executive Overview dashboard. 2. From the top menu bar, select Dashboard --> Actions... (or press Ctrl + Shift + A).

4. Configure the Filter Action:

- o Name: Filter_by_Content_Type

- o Source Sheets: Check Content Type Split. (Sheet 1)

- o Run action on: Select Select (triggers on click).

- o Target Sheets: Check Growth by Release Year and Top 10 Ratings.

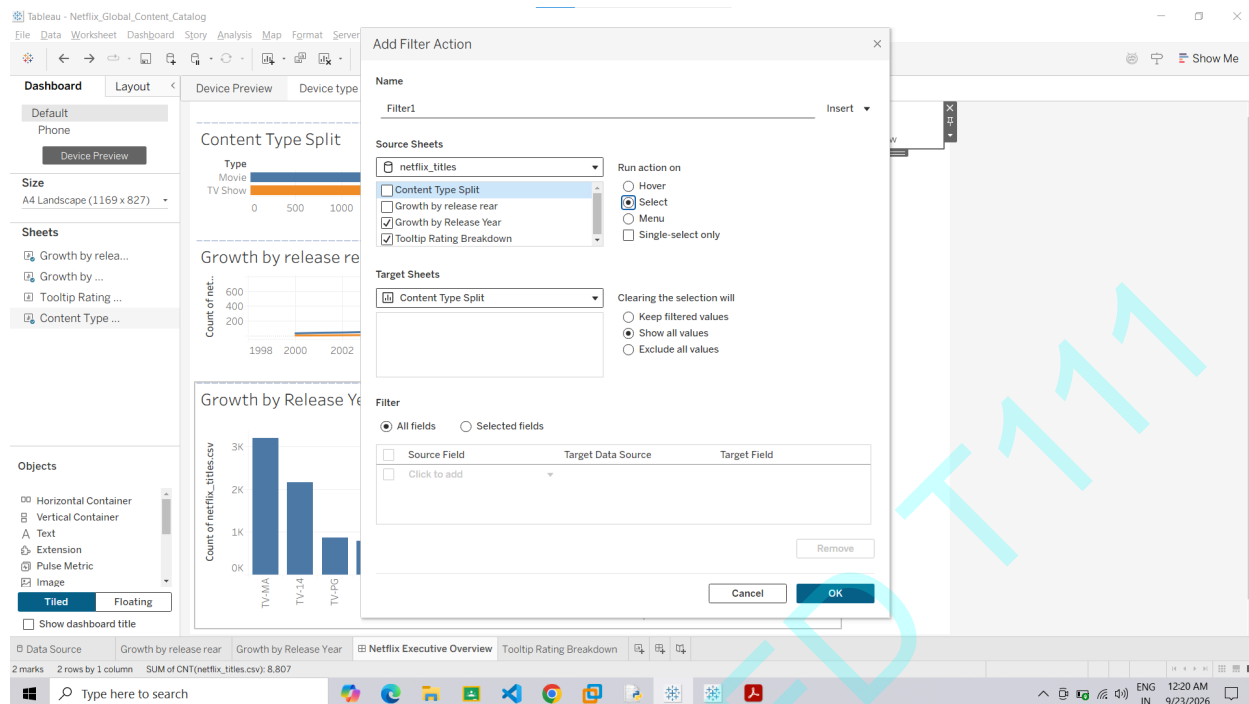

- o Clearing the selection will: Select Show all values.

- o Target Filters: Leave as All Fields.

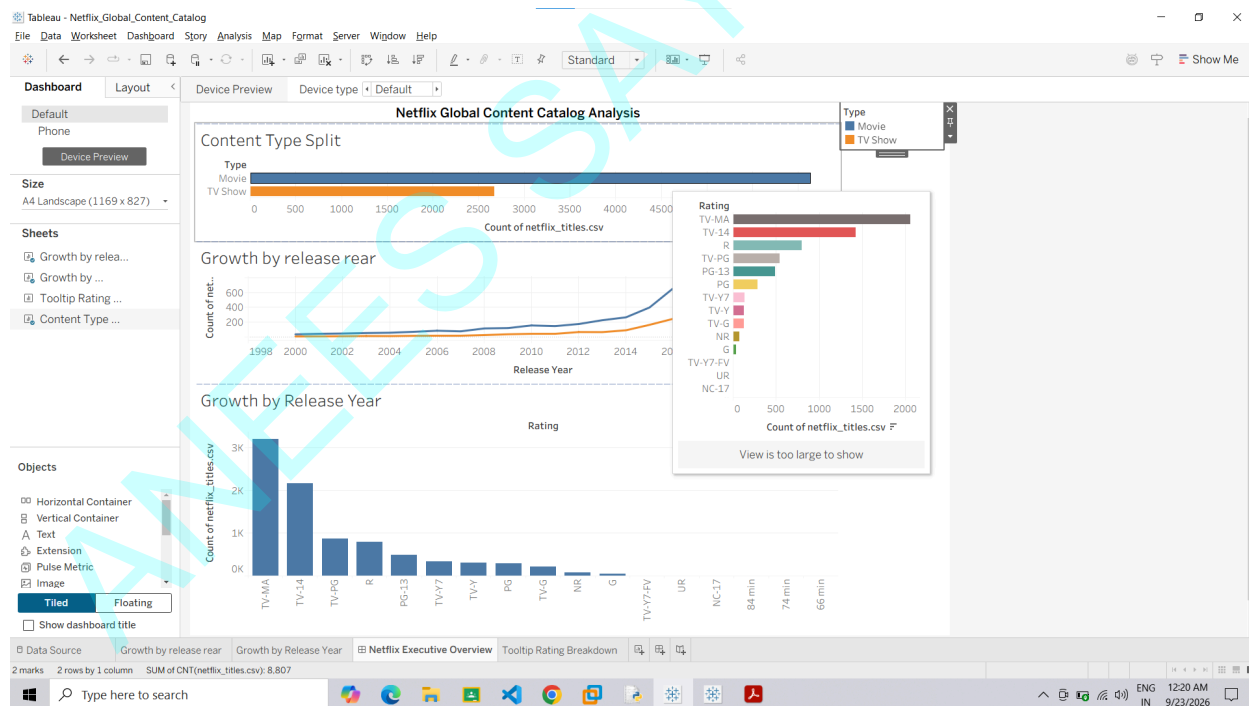

- o NOTE: Name of Sheets can be different.

SHETH MVLU COLLEGE

SUBJECT:- TABLEAU

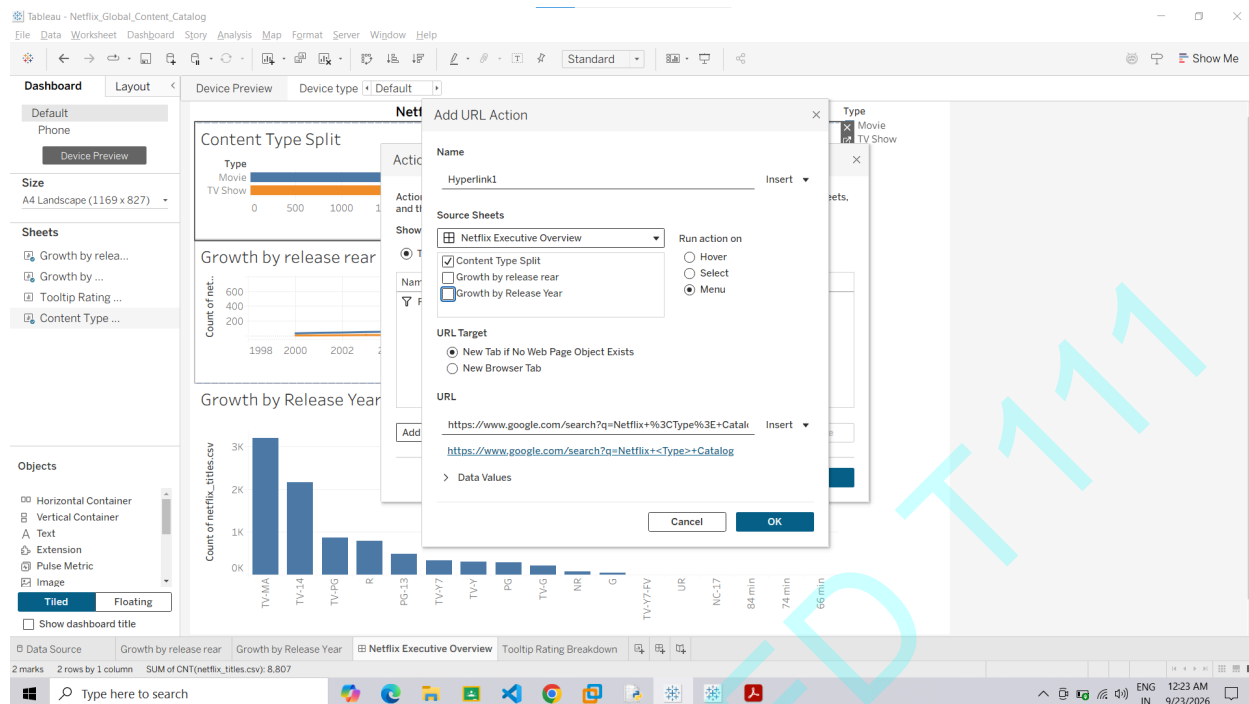

Test the Filter: Click the Movie bar; the line chart instantly updates to show release year trends exclusively for movies. Click it again to clear the filter.

Step 4:- Go to Dashboard --> Actions... --> click Add Action --> select Go to URL....

SHETH MVLU COLLEGE

SUBJECT:- TABLEAU

F: Manage Permissions and Access Control

Step 1:- 1. In the Data Pane on the left, click the small dropdown arrow next to the search bar (or right-click an empty space) --> select Create Parameter

2. Configure the parameter properties:

- o Name: Simulated_User_Role

- o Data type: String

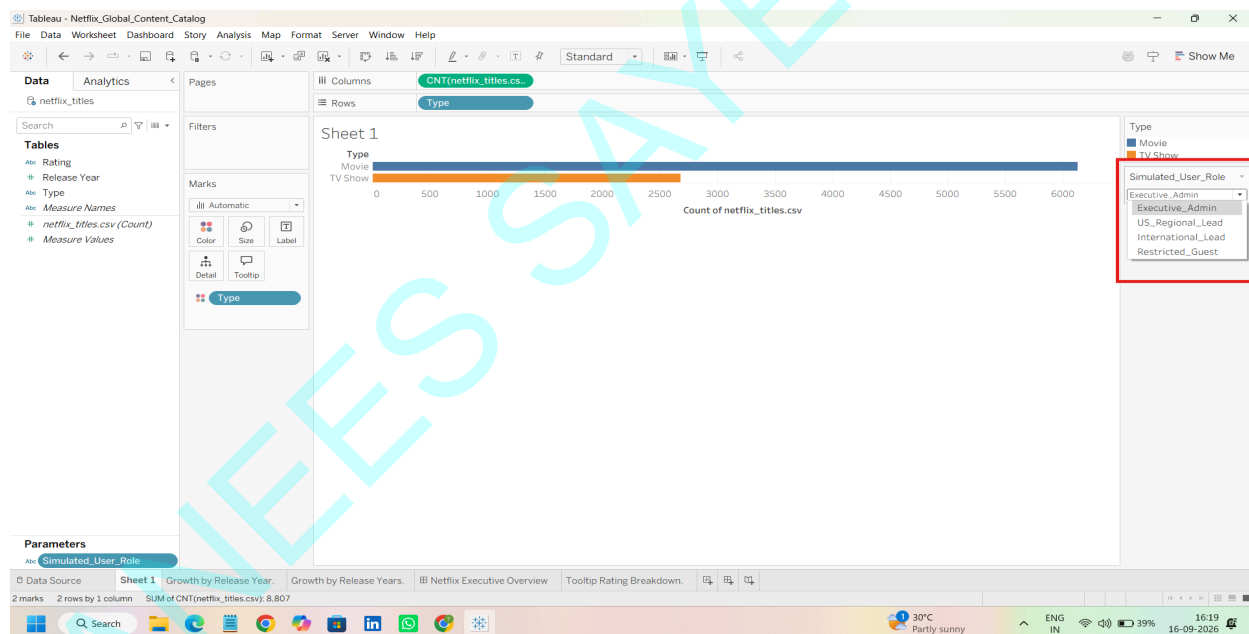

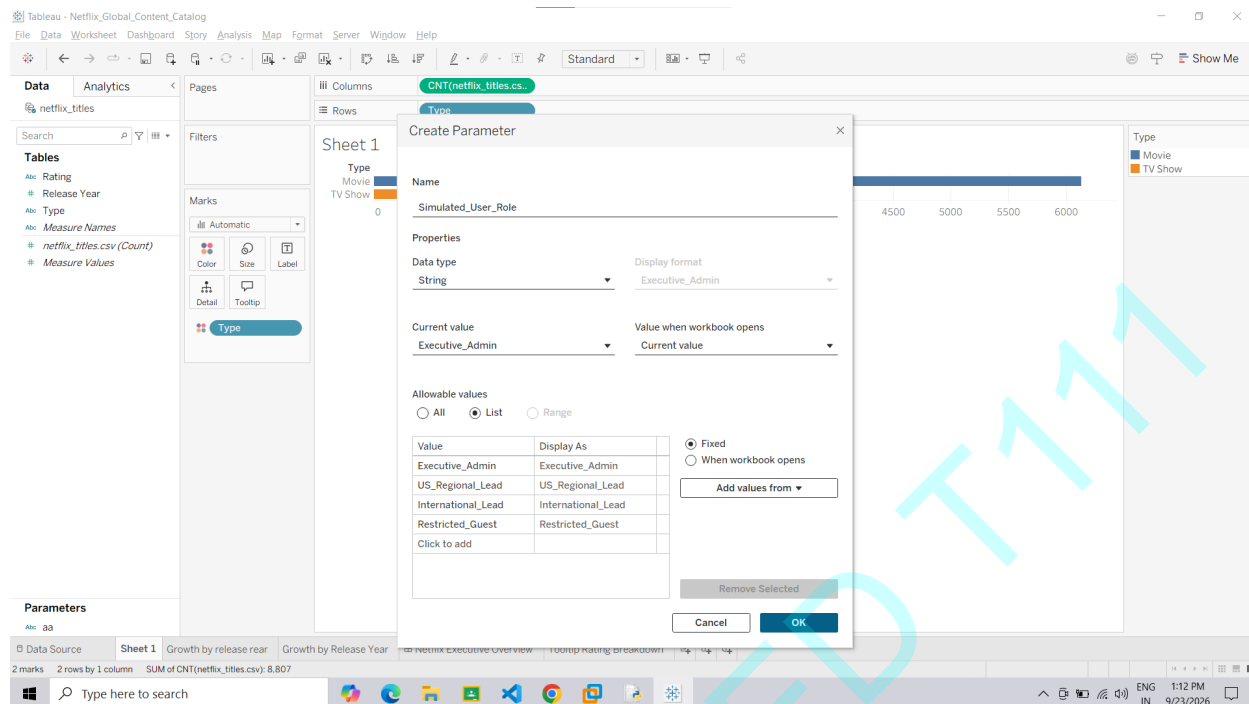

- o Allowable values: Choose List

- o Add four simulated corporate identities: 1. Executive_Admin 2. US_Regional_Lead 3. International_Lead 4. Restricted_Guest

- o Current value: Set to Executive_Admin

SHETH MVLU COLLEGE

SUBJECT:- TABLEAU

Step 2:- 1. Right-click an empty space in the Data Pane --> select Create Calculated Field....

2. Configure the field:

o Field Name: RLS_Access_Control

o Tableau Formula:

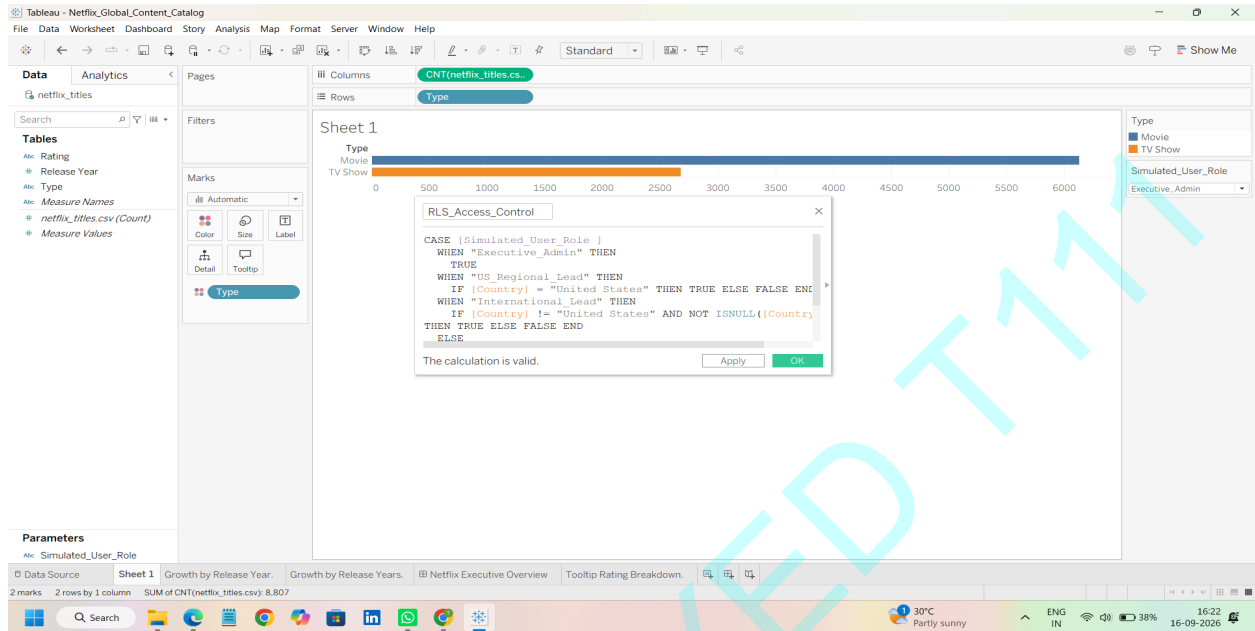

CASE [Simulated_User_Role] WHEN "Executive_Admin" THEN TRUE WHEN "US_Regional_Lead" THEN IF [Country] = "United States" THEN TRUE ELSE FALSE

SHETH MVLU COLLEGE

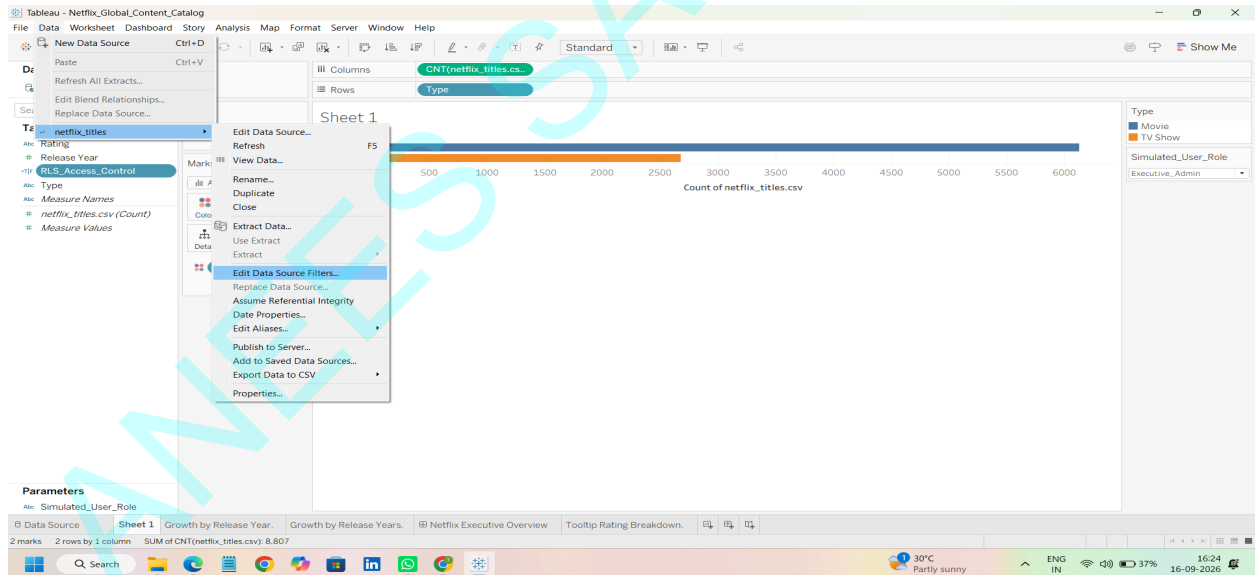

SUBJECT:- TABLEAU

END WHEN "International_Lead" THEN IF [Country] != "United States" AND NOT ISNULL([Country]) THEN TRUE ELSE FALSE END ELSE FALSE END

3. Click OK.

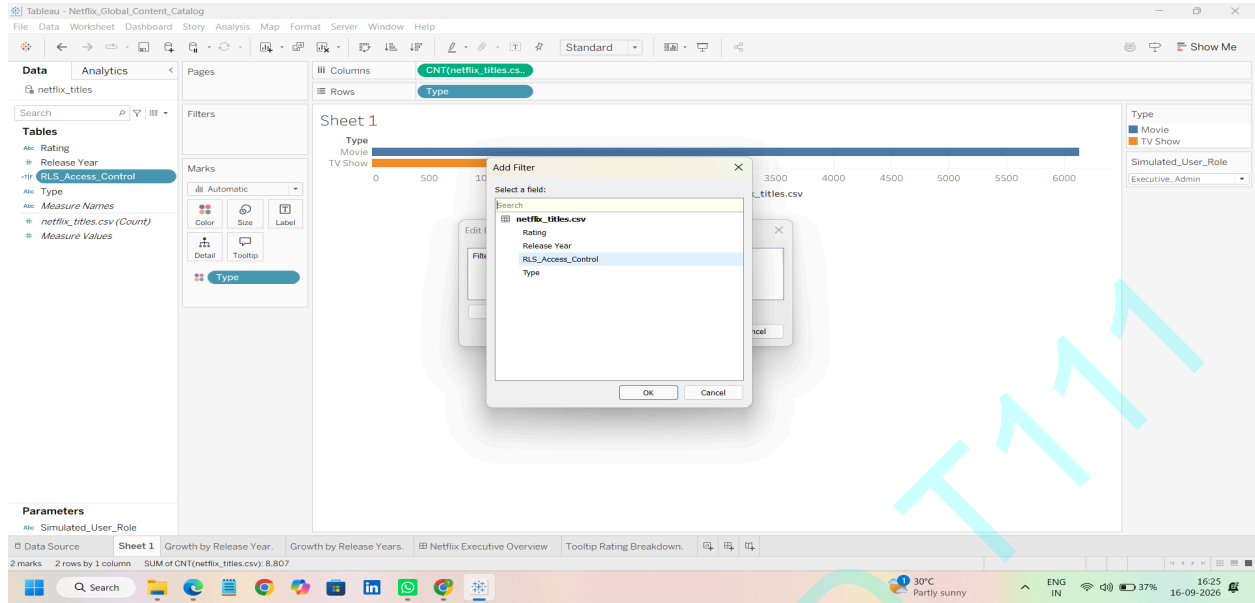

Step 3:- 1. Go to the top application menu bar --> select Data --> hover over netflix_titles --> select Edit Data Source Filters

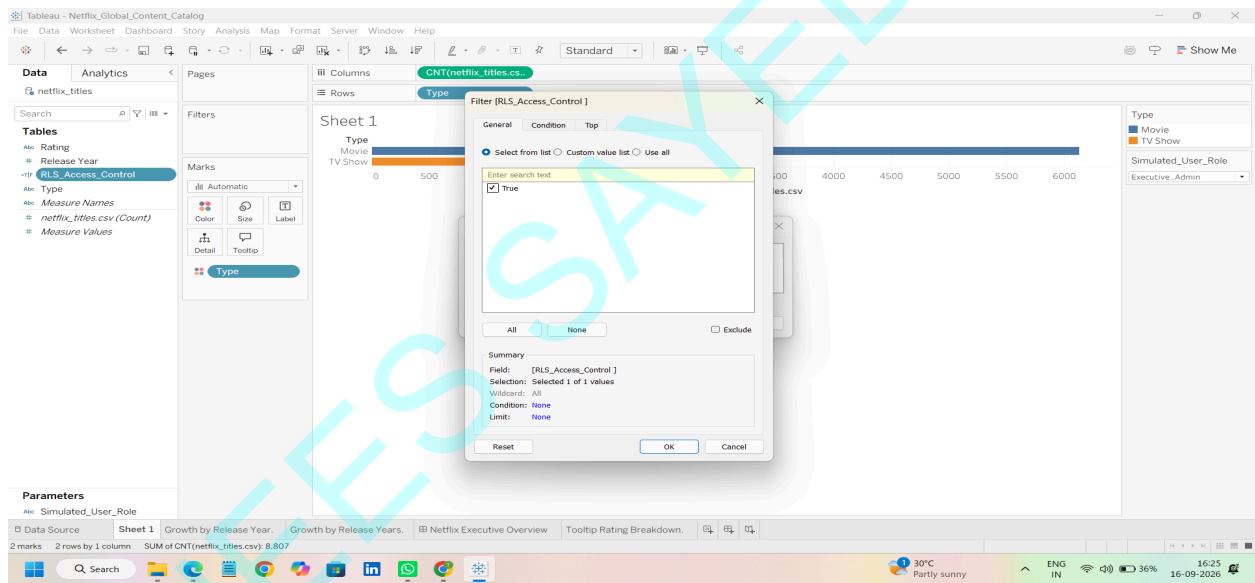

2. In the Data Source Filters dialog, click Add.... 3. Select RLS_Access_Control from the field list --> click OK.

SHETH MVLU COLLEGE

SUBJECT:- TABLEAU

4. In the filter dialog, check the box for True --> click OK, then click OK again.

SUBJECT:- TABLEAU

G: Evaluate and Optimize Sharing Strategies

Objective: Evaluate the four primary offline/local distribution methods for Tableau assets— Packaged Workbooks (.twbx), Standard Workbooks (.twb), Vector PDFs, and Static Images (.png/.emf) and apply optimization techniques to minimize file size, remove redundant data, and ensure peak rendering performance.

In environments without an active Tableau Server or cloud repository, sharing data products requires sending standalone files via email, shared network drives, or embedding them into executive presentations. Choosing the wrong local format or failing to optimize data extracts leads to bloated file attachments, broken data connection paths, and sluggish user interactions

Step 1:- 1. Go to the Data Pane on the left.

2. Click the small drop-down arrow next to the search bar --> select Hide All Unused Fields.
3. Right-click your data source (netflix_titles) --> select Extract Data... --> click Extract to regenerate a trimmed extract.
4. We have already done this step earlier.

Step 2:- Convert row-level string manipulations into boolean or integer flags where possible. Avoid nested IF-ELSE calculations on high-cardinality text fields inside the view; use native Grouping or Sets instead.

1. Hide All Unused Fields (Data Extract Pruning)

By default, Tableau extracts every column from the source file. Removing unreferenced columns significantly shrinks the .hyper and .twbx footprint.

1. Go to the Data Pane on the left. 2. Click the small drop-down arrow next to the search bar --> select Hide All Unused Fields. 3. Right-click your data source (netflix_titles) --> select Extract Data... --> click Extract to regenerate a trimmed extract. 4. We have already done this step earlier.

2. Eliminate Calculation Overheads Convert row-level string manipulations into boolean or integer flags where possible. Avoid nested IF-ELSE calculations on high-cardinality text fields inside the view; use native Grouping or Sets instead.

3. Standardize Layout Sizing for Presentations For files exported to slide decks or opened on varying monitors, set the dashboard size to Fixed Size (e.g., 1366 x 768 or 1920 x 1080) rather than Automatic. Why: Fixed sizing forces Tableau to cache the render pass once, preventing rerendering calculations every time a recipient resizes their window.

Step 3:- For files exported to slide decks or opened on varying monitors, set the dashboard size to Fixed Size (e.g., 1366 x 768 or 1920 x 1080) rather than Automatic.

Why: Fixed sizing forces Tableau to cache the render pass once, preventing re rendering calculations every time a recipient resizes their window.
